

The BMW 5 Series Saloon and Touring.

Black panel display – March 2011.

Partial black panel technology features as standard on all models. It is included on such equipment as the air conditioning controls and the instrument display.

The standard instrument display features partial black panel technology – 5.7” area highlighted above. The speedometer and rev counter dials do not feature black panel technology.

From March 2011 production, full black panel technology is available when Head-up Display (option 610) is selected. The speedometer and rev counter dials also now feature black panel technology as well as a larger 9.2” lower display as highlighted.
